

BULLHORN

Bullhorn

Introduction

An integration with Bullhorn allows you to read and write information to the ATS. You can request a Web Services API Key to connect.

Required Details

To create an integration, you require the following credentials and information:

- Username
- Password
- Web Services API Key

To set up this user:

- Use your administrator account to create the user and password
- Request the Web Services API Key from your Bullhorn representative

You can use the following email template to request this information from Bullhorn:

To: [support representative]

Body:

We are integrating RolePoint into our Bullhorn ATS, please can you provide us with a Web Services API Key for our account.

Thank you
