

## Taleo Business Edition

### Introduction

An integration with Oracle's Taleo Business Edition requires you to have access to Taleo Premium Services on your account. This allows read and write access to any Taleo Business Edition.

### Required Details

To create an integration you require the following credentials and information:

- User with Administrator permissions
- Username
- Password
- Taleo Company Code

To set up this user, you must have Administrator permissions:

- Navigate to the home page
- Select Users from the top menu
- Create a New User
- Set the Role permission to Administrator
