

## iCims

### Introduction

An integration with iCims allows read and write of data from the ATS. To integrate, you must have a Web Services License with your account.

### Required Details

To create an integration, you require the following credentials and information:

- Username
- Password
- iCims Client ID
  - This is the ID which iCims has assigned to your company account
- iCims Person Folder ID
  - This is the ID of the folder where you candidates are stored
  - It begin with a letter and is followed with numbers e.g. A12345

You will also need to whitelist RolePoint's IP addresses with iCims. You can email iCims with the following information:

---

To: [iCIMS support]

Body:

We are integrating RolePoint into our iCims ATS, to complete this please, whitelist the follow IP addresses on our account:

52.8.254.57
